

Everyday protection from damaging light rays

With thin, lightweight,
impact resistant and
affordable lenses

WHY CLEAR BLUE FILTER™?

All eyes are vulnerable.

From sunlight to digital devices, ultraviolet and high-energy blue light is everywhere. Clear Blue Filter™ lenses help safeguard eyes and may provide comfort during screen time and everyday activities.

3x

more blue light filtered than standard polycarbonate lenses

100%

UV blocking, so you're protected indoors and out

Find relief from digital eye strain.

Most of us look at screens for more than two hours a day, which is all it may take to experience symptoms such as headaches, tired eyes and fluctuations in vision. Help alleviate digital eye strain with lenses that block UVB/UVA rays and filter high-energy blue light.

Recommended as an effective UV filter for the eyes and surrounding skin.
